PROFESSIONAL SUMMARY

Fullstack Developer with strong proficiency in JavaScript, specializing in clean, high-performance, and scalable web applications. Experienced in React and jQuery for dynamic UIs and proficient in backend technologies like Node.js and Go. Effective team player with a year of collaborative development experience, adapting quickly to team dynamics and shared goals. Passionate about writing maintainable code and optimizing user experiences.

WORK EXPERIENCE

Software Developer 04/2024 – 07/2025

Insider One | Turkiye

- Developing and integrating our products to enhance partner marketing performance within an agile, Kanban-driven team.
- Proficient in CSS, JavaScript (jQuery), Git, and currently building scalable web services using Go.

Frontend Developer 08/2023 – 09/2023

Jotform | Ankara/Turkiye

- With my team, we completed a fullstack Learning Management System project for Jotform from scratch.
- The project won the "Best Growth Project" award of the 2023 Internship program.

EDUCATION

Kocaeli University 07/2020 – 08/2023

Bachelor of Science in Computer Engineering | GPA: 3.18

SKILLS

Technical: Javascript, NodeJS, TailwindCSS, ExpressJS, Jquery, Golang

Tools: Claude, Jira, AI Tools

PROJECTS

Learning Management System Project

Learning Management System that integrates tutorial videos of Jotform products into Jotform's.

Stack: React, PHP, TailwindCSS, Figma

ARCHIVE SYSTEM WITH BLOCKCHAIN

This project was based more on theoretical research and development, it presented an effective study at the collage. I worked on Smart Contract development with Solidity on Ethereum, optimizing contracts (blockchain network) and running demos on a blockchain platform (Hyperledger).

Stack: Hyperledger Fabric, Solidity, IoT, NodeJS, Go

CERTIFICATIONS

Javascript Algorithm and Data Structures | FreeCodeCamp 06/2024
