PROFESSIONAL SUMMARY

Fullstack Developer with strong proficiency in JavaScript, specializing in clean, high-performance, and scalable web applications. Experienced in React and jQuery for dynamic UIs and proficient in backend technologies like Node.js and Go. Effective team player with a year of collaborative development experience, adapting quickly to team dynamics and shared goals. Passionate about writing maintainable code and optimizing user experiences.

WORK EXPERIENCE

Web Developer 04/2024 – 08/2025
Insider One · Istanbul, TURKIYE

- Developing and integrating our products to enhance partner marketing performance within an agile, Kanban-driven team.
- Proficient in CSS, JavaScript (jQuery), Git, and currently building scalable web services using Go.

Frontend Developer Intern 08/2023 – 09/2023
Jotform · Ankara, TURKIYE

- With my team, we completed a fullstack Learning Management System project for Jotform from scratch.
- The project won the "Best Growth Project" award of the 2023 Internship program.
- I contributed to the project as a frontend developer using React, TailwindCSS, Git, Github technologies.

Web Developer 01/2022 – 04/2024
FINIC · Freelance

- I helped Web Applications to provide smoother customer experience by improving their performance.
- Fullstack web development (Html, Css, Js, Php, Jquery, NodeJS)

SKILLS

Tech: Javascript, Typescript, Claude, PostgreSQL, MongoDB, CSS, Vue, RAG, Effective AI using

General: Fast Learning, Team player

PROJECTS

FULL-STACK LEARNING MANAGEMENT SYSTEM

Learning Management System that integrates tutorial videos of Jotform products into Jotform's.

Stack: React, MySQL, Figma, TailwindCSS

ARCHIVE SYSTEM WITH BLOCKCHAIN, TUBITAK 2209A (R&D)

This project was based more on theoretical research and development, it presented an effective study at the collage. I worked on Smart Contract development with Solidity on Ethereum, optimizing contracts (blockchain network) and running demos on a blockchain platform (Hyperledger).

Stack: Solidity, EVM, Hyperledger
